

TECHNICAL DATA

Flow rate: from 1 m³/h to 6 m³/h

Head up to: 45 m (900 version) - 30 m (650 version)

maximum immersion depth: 12 m

Type of pumped liquid: clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral

Liquid temperature range: from 0°C to +40°C

Maximum operation depth: 15

Flanges, thread: 1" (supplied as standard with a four-section fitting-reducer)

Pump maximum diameter: 160 mm

Impeller/s material: technopolymer

Maximum number of starts: 20/h

Protection class: IP 68

Motor insulation class: F

Single phase power input: 230 V 50 Hz

Power cable (m) and plug: 15 m H07RNF with power plug

Possible type of installation: fixed or movable in vertical position

Special versions on request: cable of different length, different type of power plug

Multi-impeller submersible pump with integrated electronic for automatic switching on and off. There are versions with two or three impellers available. The pump is designed for pressurization, gardening and irrigation in residential building service.

CONSTRUCTION FEATURES OF THE PUMP

Pump body and impellers in technopolymer to resist corrosion and oxidation. The delivery has an integrated non-return valve. There are version with anti-debris filter in technopolymer or fitting with brass insert for use with float suction kit (the X version). Version with float switch also available.

CONSTRUCTION FEATURES OF THE MOTOR

Asynchronous motor. Motor shaft in stainless steel AISI 416 + AISI 304. Integrated starting capacitor and thermal protection against overheating of the motor.

FEATURES OF THE ELECTRONIC

The electronics allow automatic switching on and off. The pressure switch and the flow sensor are integrated. Dry running protection. Quick access to the capacitor compartment.
