Light Wastewater Pump Type ABS MF 154HW

Compact submersible pump for the removal of domestic and commercial high temperature wastewater that can contain solids up to 20 mm.

Applications

The MF 154HW submersible pump has been designed to cover a wide range of internal and external dewatering applications, but primarily where the temperature of the medium exceeds the standard upper limit (40 °C) to a maximum allowable temperature of 80 °C.

- Pumping of high temperature discharge water from laundries, commercial dishwashers and washing machines.
- Filling and emptying of containers, drainage of flooded cellars and removal of rainwater.
- Suitable for use in septic tanks and pumping effluent from locations below the backwash level in accordance with EN 12056.
- The vortex hydraulics are particularly suitable for the pumping of fluids containing gaseous or abrasive particles.
- The compact shape of the MF, fittings for easy mounting, and small sump requirements, ensure a quick and cost-effective installation of the pump.
- Maximum allowable temperature of the pumped medium is 80 °C.

Construction

The water-tight, fully flood-proof cast iron motor and the hydraulics section comprise a compact, robust, unit construction.

Motor

Single-phase 220-240 V, 50 Hz, 2-pole (2900 r/min) motor. Insulation class F; protection type IP68.

Bearings

The stainless steel rotor shaft is supported in lubricated-for-life ball bearings.

Shaft sealing

Between motor and hydraulic section by means of a high quality mechanical seal of carbon / silicon carbide. Seal at motor side is an oil-lubricated NBR lip seal. Both are independent of direction of rotation and resistant to temperature shock.

Temperature monitoring

TCS (Thermo-Control-System) with thermal sensors in the stator to switch off the pump in the case of overheating and switch on automatically after cooling down.

Hydraulic section with vortex impeller

Free solids passage of 20 mm.

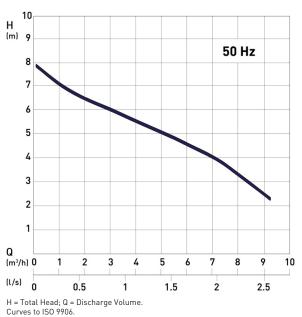

Materials

Description	Material
Upper Lid	Stainless steel 1.4301 (AISI 304)
Motor Housing	Cast iron EN-GJL-250
Rotor Shaft	Stainless steel 1.4021 (AISI 420)
Volute	Cast iron EN-GJL-250
Impeller	Polyamide
Cable	Neoprene
Fasteners	Stainless steel 1.4401 (AISI 316)

Features

- □ Simple, cost-effective, pump installation.
- Vortex hydraulics for blockage-free pumping in critical applications.
- □ Free-standing on legs, or pedestal mounted.
- \square Discharge connections G $1^{\prime}\!\!2^{\prime\prime}$ internal $1^{\prime}\!\!4^{\prime\prime}$ adaptor.
- Mechanical and lip seals on rotor shaft.
- Thermal sensors to protect motor against overheating.
- Float switch for automatic level control.
- EasyFit plug-in cable connection.
- □ Fitted with Schuko plug.

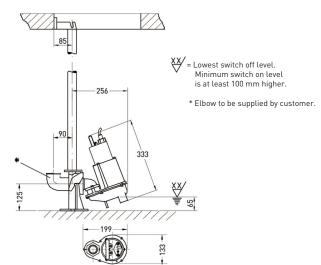

Performance curve

Technical data

MF 154HW	
Discharge connection	G 11⁄2"-11⁄4"
Motor power (kW)* P ₁ P ₂	0.65 0.42
Speed (r/min)	2900
Rated voltage (V)	220-240 1~
Rated current (A)	2.8
Cable type (H07BN4-F)	3G1.0
Cable length (m)	10
Weight (kg)	8.5
Solids size (mm)	20

* P₁ = Power taken from mains. P₂ = Power at motor shaft According to VDE regulations submersible pumps for use externally must have a fixed cable connection with a length of at least 10 m. Regulations vary by country.

Dimensions (mm)
